Experience

Aug 2026 – Present
Game Rezort
Senior Unity Developer

In my current role, I develop Unity mobile games, building gameplay systems, interactive mechanics, and polished player experiences from early prototype through release. I focus on clean architecture, smooth performance, and reliable delivery across mobile platforms.

Aug 2022 – Nov 2025
No Borders Innovations (SMC-PVT) Ltd.
Senior Unity Developer

At No Borders Innovations, I led the development of metaverse-based interactive environments and advanced 3D systems, creating immersive mechanics and scalable architecture. I worked with multiple character types, implementing unique behaviors, movement logic, and dynamic customization features. I also integrated APIs and connected Unity applications with AWS servers to fetch, store, and synchronize user data in real time. Alongside this, I optimized performance by improving memory usage, asset workflows, and overall responsiveness to ensure a smooth and high-quality experience across platforms.

Sep 2021 – Jul 2022
Vie Apps Studio
Senior Unity Developer

At Vie Apps Studio, I played a key role in training and onboarding new Unity developers, providing hands-on guidance in coding standards, project structure, and best development practices. I also contributed to improving workflow efficiency by refining internal processes and introducing more organized development methods. Through these efforts, I helped elevate the overall quality, consistency, and productivity of game development projects across the team.

Oct 2019 – Aug 2021
Mindbotix
Senior Unity Developer

During my time at Mindbotix, I developed hyper-casual mobile games from initial concept through final deployment, focusing on engaging mechanics, optimized performance, and rapid iteration. I also led and mentored a team of Unity developers, providing guidance on best practices, clean architecture, and efficient workflows. By supporting the team throughout development cycles, I helped ensure smooth execution, timely delivery, and consistent quality across all projects.

Experience

Feb 2019 – Sep 2019
Game District
Unity Developer

At Game District, I focused on developing a variety of pretend-play mobile games, including cooking simulations, fashion experiences, and grocery-shopping scenarios. I designed gameplay systems tailored to each theme, built character controllers, and implemented interactive mechanics such as ingredient handling, outfit selection, and item management. I also refined UI flows and enhanced responsiveness to improve user engagement and deliver polished, kid-friendly gameplay across multiple pretend-play genres.

Feb 2018 – Nov 2018
Blue Horn Technology
Jr. Game Developer

I began my professional journey at Blue Horn Technology, where I contributed to the development of basic 2D and 3D mobile game prototypes. This role allowed me to gain hands-on experience with core Unity tools, scripting fundamentals, and essential game development workflows. Working on small but diverse projects helped me build a strong foundation in gameplay mechanics, scene design, and optimization techniques, preparing me for more advanced roles in Unity development.
